

## Thermo-Strip Wire Stripper

### MAIN FEATURES

Adjust the heat up to 1800 F (982 C) for the precise amount you need for the specific application.

Long Nose Allows reach into hard-to-reach areas.

Five different preformed heated elements are available to strip machine insulation from 36 AWG to 3/8 in. diameter.

Can be used as a hand tool or benchtop stripper.

Total unit weighs less than 7 lbs.

Can change just the heating element, rather than the entire tip, reducing operating costs.
