

The first name in wire processing

ASM-400 Seal Loading Unit

This compact unit can be fully integrated into the Artos Cr.22 and MTX family of products to provide the expanded capability of automatically applying weather seals onto the end of wires. The design of this unit allows for trouble free operation and easy changeover.

The ASM-400 unit features a quick-change seal-feeding track and guiding system reducing machine downtime due to set-up. These seal kits are interchangeable with Pawo SLU. The ASM-400 can also accept SSM seal kits.

The ASM-400 offers several advantages over similar designs. These advantages include a reduced cycle time, simplified jaw change over, and use of a light curtain to eliminate adjustment during large seal kit change-over.

The optional seal presence sensor allows for in-process quality check of seal insertion.

MAIN FEATURES

- Faster cycle speeds
- Incorporates 12mm light beam to simplify set-up of large kits
- Narrow profile reduces space requirements
- Improved design for Jaw change-over
- Complete integration to Artos MTX/CTX/CR.22 Series processor
- Easy refill of seals

TECHNICAL SPECIFICATIONS

Electrical Requirements

100 – 240 V, 50-60 Hz.

Pneumatic Requirements

6 Bar (80 PSI)

Size

W100 x H880 x D650mm
(4 x 34.75 x 25.75 Inch)

Weight

25Kg (55 lbs)

Options

Seal Tooling Kit (Sold Separately)
Machine Mounting Kit
Seal Presence Sensor

Payment terms 1/3 down, 1/3 prior to shipment, 1/3 net 30 days with approved credit. Delivery will be determined at time of order entry. All other Artos' Standard Terms of Sale apply. Specifications are subject to change without notice. All prices are ex-works Artos.
