

The first name in wire processing

ES-100

Manual Wire Stripper

MAIN FEATURES

The Artos ES-100 electrically operated wire stripper is quick, easy, and efficient! The easily adjusted settings on the graphic display allow you to program the cross section and strip lengths in seconds.

An automatic clamp adjustment is sensitive to insulations and protects your wires when gripping to pull and strip.

The partial strip function prevents your wire strands from fanning out and allowing cable to be prepared in larger volumes.

All electric operated is easy to set up and use. Just plug in and operate! Easy to read settings!
