

Wire Terminator Station

- ✓ **Fast**
- ✓ **Versatile**
- ✓ **Ergonomic Design**
- ✓ **Remote Version Available**

Press Head

PROVEN IN HIGH VOLUME PRODUCTION

Bulk contacts are automatically fed from two bowls to an automated power crimper

- Changes from pins to sockets with the flip of a switch
- Ergonomic design that meets OSHA Safety Requirements
- No tape, bandoliers, cartridges or mechanical arms necessary
- Reverse hyperbolic funnel assists operator with inserting wire into contact
- Bulk contacts are automatically singulated and fed to an automated power crimp head
- Conforms to Mil-C-22520 performance requirements
- Each machine handles two types of contacts
- Compact design
- Processor will compensate and/or feed another contact if operator makes a mistake providing maximum productivity
- Supplies contacts on demand for efficiency
- Hand held remote version available
- Press Head available for use in wire process machines
- Automatic contact feed with foot pedal triggered crimping or autofire wire triggering.
- Advanced PLC control contact feeder logic systems with rapid error recovery
- Automatic rejection and containment of rejected contacts
- Cycle time on the average is 1.5 second
