Good afternoon!

I just wanted to touch base with you regarding the avenues of after sale support available from Markem-Imaje. Above are the two most common numbers used to reach our representatives and I am including my local information below. We appreciate your business and will work hard to earn your trust and strengthen our partnership. In addition to providing excellent printing equipment, we also offer a full line of consumables, spare parts and services needed to support and sustain your coding operations.

Protect Your Investment; Minimize Your Operating Costs

I'd like the opportunity to show you how you can protect your investment and lower your cost of ownership through the use of genuine Markem-Imaje consumables and our professional services. In addition to on-site and repair center service options, we also offer service agreements and training programs that can be tailored to support your operational strategy.

Our complete line of Markem-Imaje consumables are chemically formulated and manufactured to specifically meet the operating parameters of our equipment and to give you many years of worry-free operation.

I would be happy to help develop an operating plan to **minimize cost** and downtime and **maximize** the return on your marking and coding investment. Please feel free to contact me at any time to review your account and possible cost savings strategies.
